

Smart Inventory Intelligence Dashboard – A Unified Analytical View for Product Performance

A modern analytical dashboard designed to centralize inventory and sales data, enabling brands to monitor product performance and revenue growth with precision.

Overview & Objective

Develop an interactive Power BI dashboard for inventory and sales performance

Provide centralized visibility into KPIs: Inventory Units, Inventory Value, Revenue

Enable brand-specific insights via dynamic filtering

Track top and bottom product performance

Identify sales trends using quarterly analysis

Support data-driven decision-making for stakeholders

Client Requirements

- Combine *Master* and *Sales* datasets
- Build slicer-based filtering for Dior, LV, Nike, Prada
- Track and display:
 - Total Inventory Units
 - Inventory Value
 - Revenue
- Visualize revenue trends using bar and line charts
- Highlight Top 10 and Lowest 10 products by revenue
- Set up data modeling: calendar hierarchy, relationships, and quality checks

Dashboard

[illegible]

How to Use the Dashboard

Use Brand Slicer

Switch between brand-specific performance

Analyze quarterly revenue charts

Identify seasonal or trend-based shifts

Examine product-level data

Evaluate pricing and stock positions

Identify high revenue generators

Review Top 10 for restocking or promotion

Review low performers

Analyze Bottom 10 for possible exit, bundling, or discounts

Leverage clean data model

Ensure accurate comparisons and slicing

Growth Insights

- Optimize inventory allocation based on sales potential
- Prioritize investment in high-performing SKUs and brands (e.g., Nike, Dior)
- Explore promotional strategies for lower-tier brands (LV, Prada)
- Track quarterly peaks to align campaigns and supply chain planning
- Consider pricing tweaks for mid-range items with high stock but low revenue

Conclusion

Scalable Power BI Solution

Transforms raw data into strategic insights

Informed Decision-Making

Enables stakeholders to make informed, brand-specific decisions

Portfolio Optimization

Highlights opportunities and risks within product portfolios

Foundation for Growth

Lays the foundation for proactive inventory and revenue management

Thank You

Thank you for the opportunity to design and deliver this strategic Power BI dashboard. Looking forward to continued collaboration and delivering data-driven value in your next business intelligence journey.
